Manny Garcia

Software Engineer I

📍 NY, NY ✉ mannyalgarcia@gmail.com 📞 909-921-7218 ⓞ mannyxgarcia 𝗂𝗇 mannyxgarcia ✸ mannygarcia.dev

Technical Skills

Proficient - Javascript, Typescript, React, React Hooks, Redux, Scala, SQL, Git, HTML5, CSS, REST, CRUD, Chrome Developer Tools

Knowledgeable - noSQL, Passport(OAuth), Travis CI, Firebase

Personal Projects

my-MUI, *Full Stack Engineer | http://my-mui.com*   04/2020
A tool to help build and style Material UI components easier and faster.
- A theme styler allows for the customization of a Material-UI theme with a dynamic visual interface.
- Built with React hooks to manage state, Firebase to store user data, and Material-UI for styling components.
- Adjust color, button styling, typography, and alerts with palettes, switches, sliders + more.
- Drag and Drop, implemented with vanilla JS, to arrange and resize grid layouts.
- Designs can be downloaded, saved, or shared with other users.

Green Shopper, *Full Stack Engineer | https://green-shopper.herokuapp.com/*   03/2020
A fully deployed e-commerce site selling plants.
- Created a fully functional shopping cart with ability to purchase and view past orders.
- Implemented local login and google OAuth protocol.
- Built with React, Redux, MaterilizeCSS, Sequelize, Express, and Node.js

Homestead Studios, *Solo Developer | https://stackathon-project.firebaseapp.com/*   03/2020
A mock interior design website developed over 3-days
- Complete with a functional contact us page, an estimates calculator, and a project gallery where workers can upload, edit, and delete photos.
- Built using React hooks, Material-UI, Firebase, and Google Cloud Functions.
